

# Scion Controller

A simple, economical, stand alone touch screen sorter control system

Compac Sorting Equipment now offers an economical simple control system for fruit and vegetable sorters, graders or sizers. Scion is ideal for controlling Compac single or dual lane sorters\* or it can be retrofit onto existing sorters from other manufacturers\*.

Scion is suitable for companies looking for a cost effective, easy to use controller. This could include smaller packhouses, use on low and high volume lines or on lines set up with Compac's bagging or gentle carton filling systems. Very suitable for use where simplicity is a requirement.

Scion is robust, reliable and anyone can quickly learn the operation. Service and support is only a phone call away with Compac technicians on call 24 hours.
